

IDENTIFICATION OF RELATIVE VEGETATIVE BIOMASS IN WESTMOUNT AND BYRON DISTRICTS IN LONDON, ONTARIO

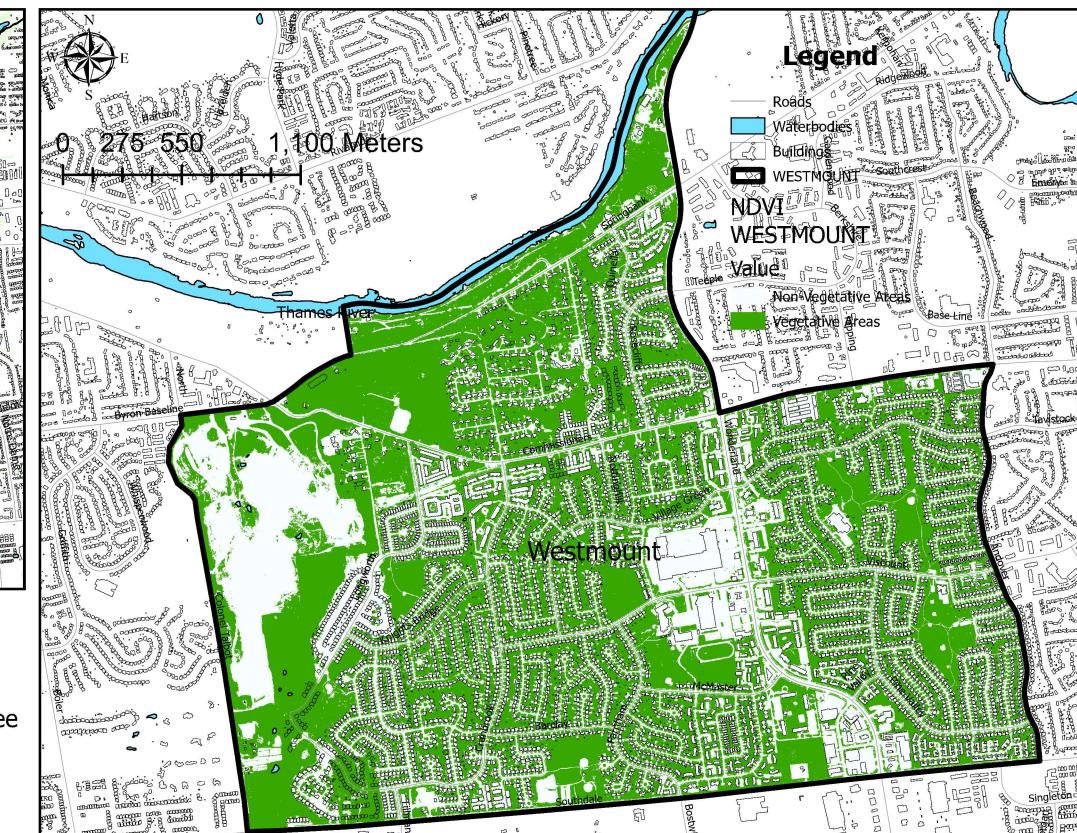

WESTMOUNT

RGB IMAGE

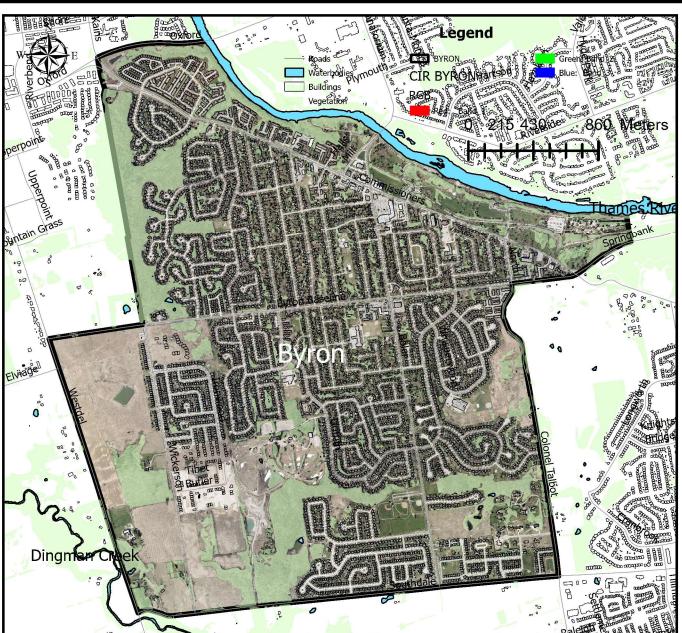

INFRARED IMAGE

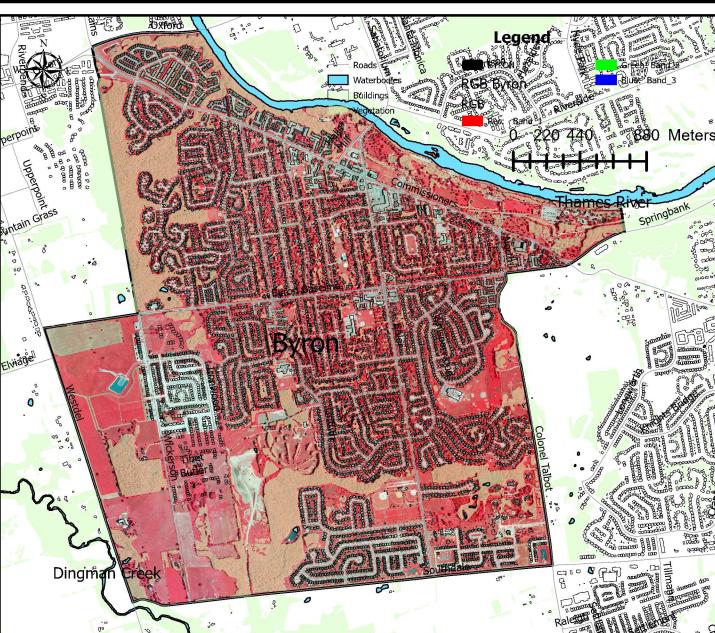

NDVI

In this NDVI map of Westmount Planning Districts we can clearly see that the District has large cover of Vegetative Biomass and also good amount of Residential Areas in between them but the district is dominated with Vegetation. The bank of Thames River has large continuous Vegetation Areas as a distinctive feature in the Westmount Planning District.

BYRON

RGB IMAGE

INFRARED IMAGE

NDVI

In this map of Byron Planning Districts we can see as the Westmount district it is also Predominantly Covered with Vegetative Biomass and also good amount of Residential Areas. The Byron district has less continuous vegetation areas as visible in the NDVI image and has a lot of housing in between it.
